Electric rates for Michigan customers

The rates in this brochure reflect the base rates previously authorized by the Michigan Public Service Commission for We Energies' Michigan retail customers.

Energy you can depend on

Rate Options

We recommend you review the rate options and prices listed in this brochure. Your current rate description is listed on your bill. Compare this rate description to the other rate options described here. While you are the best judge of which rates are best for your situation, we'll be glad to help you compare rate options. Complete rate schedules are available upon request. You also may request energy use and weather-adjusted consumption data for the last 12 months. Visit uppermichiganenergy.com for more pricing information.

We itemize, or "unbundle," charges on your bill for Power Supply and Delivery. Your itemized charges for Power Supply include costs to generate or purchase the electricity and transport it over power lines to local distribution systems. Your itemized charges for Delivery include costs to deliver the electricity to your home, as well as certain customer services. Not all Time-of-Use rates reflect this itemization.

The base energy charges are subject to a Power Supply Cost Recovery (PSCR) factor to reflect changes in fuel costs. The current PSCR factor is a charge of \$0.00000 per kWh. The current cost base is \$57.10 per MWh.

Many customers may benefit from our Time-of-Use rate option. With Time-of-Use, you pay a lower rate when the demand for electricity is low (weeknights, weekends and holidays) and a higher rate when demand is high (weekdays on-peak hours).

Each Time-of-Use rate has its own on-peak and off-peak periods. All time periods as stated are the local time Monday through Friday, excluding those days designated as the legal holidays for New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The off-peak periods consist of all hours not designated as an on-peak period.

Michigan Customer Choice

Most Michigan electric customers have a Retail Access Service option or choice to purchase their generation and transmission service from a licensed unregulated Alternative Electric Supplier (AES) at a price determined solely between the customer and the AES, with power delivered through the Company's distribution system. The AES will charge its customers for the energy and transmission services to transport the electricity across the high voltage lines to your home or business. The utility will charge you for the distribution services on the low voltage lines and the utility will charge AES customers for the availability of generation (capacity) if the AES has not secured generation capacity for your home or business. Customers may continue to buy their power supply from the local utility under Full Requirements Service at prices regulated by the Michigan Public Service Commission.

Experimental Renewable Energy Rider Rates

Customers have the option to participate in the Company's *Energy for Tomorrow* renewable energy program. The program gives customers the option to pay a premium for the Company to obtain generation fueled by renewable resources. Use of renewable energy resources has a positive impact on the

environment and reduces the consumption of non-renewable resources.

Participation in this program allows customers to nominate to pay a premium on their usage for the Company to obtain energy from generating sources that are fueled by renewable resources. The premium is a per kWh adder under Power Supply Charges that is based on the rate schedule under which the customer is being served.

Customers participating in the Energy for Tomorrow program, with at least 50% of their energy usage coming from generating sources fueled by renewable resources, do not have to pay the Renewable Energy Surcharge.

Visit www.uppermichiganenergy.com/rates/mi-energy-for-tomorrow.htm for a detailed breakdown of the costs of the Company's Energy for Tomorrow renewable energy programs.

Experimental Renewable Energy Rider (ERER1)

Available to customers taking service under rate schedules Rg1, Rg2, Cg1, Cg2 and Cg5, who pay a premium on their usage for the Company to obtain energy from generating sources that are fueled by renewable resources for 25%, 50%, or 100% of their usage. In addition to the charges of the rate schedule under which the customer is served, there will be an adder per kWh based on the level of participation selected by the customer as follows:

Participation Level – 25%	\$0.00212 per kWh
Participation Level – 50%	\$0.00425 per kWh
Participation Level – 100%	\$0.00849 per kWh

Experimental Renewable Energy Rider (ERER2)

Available to customers currently taking service under rate schedules Cg3, Cp1, and Ms1 who nominate to pay a premium on a block of their usage to allow for the purchase of a block of energy generated by renewable resources. In addition to the customer's charges as indicated in the rate schedule under which the customer is served, there will be an adder of \$0.00849 per kWh applied to the lesser of the kWh consumed or the kWh nominated for renewable energy.

Experimental Renewable Energy Rider (ERER3)

Available to customers currently taking service under the Cg3, Cp1, and Ms1 rate schedules who pay a premium on their usage for the Company to obtain energy from generating sources that are fueled by renewable resources for 25%, 50%, or 100% of their usage. In addition to the customer's charges as indicated in the rate schedule under which the customer is served, there will be an adder per kWh based on the level of participation selected by the customer as follows:

Participation Level – 25%	\$0.00212 per kWh
Participation Level – 50%	\$0.00425 per kWh
Participation Level – 100%	\$0.00849 per kWh

Subject to PSCR factor.

Customers are required to remain on the selected on-peak period for at least one year. The on-peak periods available are 8 a.m. to 8 p.m. and 10 a.m. to 10 p.m.

The monthly minimum charge is the Fixed Charge, the Renewable Energy Surcharge plus the Demand Charge for Contract Demand. Contract Demand shall be no less than 50 megawatts.

* Charge for customer that takes service at 13,800 volts or greater, but less than 69,000 volts directly from a Company-owned substation transformer and is served using no Company-owned primary lines.

Experimental Short Term Productivity Rider (STPR)

Available under special contract to customers currently taking service under the Cp1 or Cp3 rate schedules for the purpose of allowing customers which have shifted load off-peak to extend operations to the four-hour period of 8 a.m. to noon and the four-hour period of 6 p.m. to 10 p.m. for either one hour or a maximum of two contiguous hours per four-hour period when system capacity is available, and at the sole discretion of the Company. Each four-hour period is considered an "excess period." During an excess period, the customer will pay the rates shown below, and will not incur additional on-peak demand charges for usage in accordance with the terms and conditions of this Rider. This Rider does not waive the additional delivery demand charges that may be incurred by higher demands under this Rider. This Rider is not intended to provide for a reduction of a customer's normal on-peak billing demand. This rider is limited to a maximum of 20 customers.

All excess kWh are priced at the higher of:

The two-hour average, for each of the two contiguous hours of each excess period that the customer is eligible to utilize, of the day ahead cleared Locational Marginal Prices for the WEC load zone in which the customer is located, plus 10% OR \$0.10 per kWh for all kWh when 1,000 or more kWh is billed in an excess period OR \$0.12 per kWh for all kWh under 1,000 kWh per excess period.

During an excess period, the excess kWh is the difference between the kWh during the excess period on a 15-minute interval basis minus the kWh during the 15-minute interval in which the on-peak maximum demand occurs for the billing period. The excess kWh will not be negative. The excess period will consist of one or two whole hours as requested by the customer in advance.

Administrative Charge:\$100.00 per month

Minimum Charge\$60.00 per excess period plus the Administrative Charge.

Except as noted above, all charges and credits of the respective rate schedule under which a customer is served are applicable.

Experimental Dollars for Power (DFP)

This rider is available under special contract to customers taking service under rate schedules Cp1 or Cg3 and who are not served under any of the non-firm rate schedules (curtailable, interruptible or any other non-firm options that may be added at a future date) who agree on a voluntary basis, to reduce a nominated amount (50 kW minimum) at each separately metered delivery point.

Energy Credit is based on the one price the customer selects for its loads reduced during each load reduction period.

Available Energy Credit Prices: ... \$0.40 \$0.80 \$1.25/kWh

kWh Reduction:

The kWh reduction will be determined by subtracting the actual energy measured during each load reduction period from the energy derived from the Adjusted Reference Load Shape during the same period. The average reduction during the period must

be greater than or equal to 25 kW for the customer to receive a credit for the reduction.

Please call us for more details and assistance on this rate.

Experimental Power Market Incentives (PMI)

This rider is available under special contract to customers taking service under rate schedule Cp1 and who are not served under any of the non-firm rate schedules (curtailable, interruptible or any other non-firm option that may be added at a future date) who have 500 kW or greater of firm base load demand that they may be able to curtail.

Energy Credit:

The Company will offer a price per kWh based on the market price of energy in the region available to the Company for the purchase or sale for each hour of the curtailment period. The Company will provide either day ahead notice or same day notice.

The price that will be paid is the quoted price.

kWh Reduction:

The kWh reduction will be determined by subtracting the actual energy measured during each load reduction period from the energy derived from the Adjusted Reference Load Shape during the same period.

Please call us for more details and assistance on this rate.

Energy Information Options (EI)

This option is available under special contract to customers currently served under rate schedules Cp1, Cp4, Cg1, Cg2, Cg3 and Cg5, to provide dial-in access via a secure website to the customer's available 15 minute interval data from Company owned billing meter(s).

Option A: Dial-in access to customer's available interval data from a Company owned billing meter(s) for customers served on the Cp1 or Cp4 rate schedules \$17 per month, per billing meter.
