You easily can start, stop or move your energy service on our website or in our app.

FOCUS ON SPRING SHOWERS (AND BATHS)

Refresh your bathroom with the Focus on Baths Energy-Savings Packs. Each **FREE** Bath Pack includes four energy-efficient products, designed to help you save both water and energy, including:

- High-efficiency handheld showerhead
- Dusk-to-dawn LED night light
- 15-foot pipe insulation wrap
- Hot water temperature card

Scan the QR code or go to <https://focusonenergymarketplace.com/free> to start saving.

Limit one (1) pack per customer per year. Have your electric or natural gas We Energies account number available to order.

250045

Spring outdoor safety

Check your trees

Start spring yardwork by surveying your trees. Look for dangling or unhealthy branches, then take note of power lines near your house. Branches touching or falling on lines could cause power outages, fires or other safety hazards. That risk grows when there is severe weather. If you have limbs within 10 feet of primary electric lines, call **800-242-9137** and request a forestry inspection to determine the best course of action.

Check for emerald ash borer

The emerald ash borer (EAB) is considered the most destructive invasive species in North America and has been found

throughout Wisconsin. Ash trees die within three to five years of infestation, creating a risk of branches falling on power lines or property. Signs of EAB include cracking bark and woodpeckers boring into the tree searching for EAB larvae.

Safety reminders

Before you do any trimming or planting, know what's **above** and **below**.

- Use a professional arborist for tree trimming and removal — especially when working near power lines.
- Never let ladders or tools come in contact with power lines.
- Research the mature size of trees and shrubs, and plant away from power lines, pad-mounted equipment and underground utilities.

Go to www.we-energies.com/safety/tree-trimming for examples of planting safely around power lines and equipment.

April is National Safe Digging Month.

Call **811** or go to diggershotline.com at least three business days before you begin any digging project. This free service marks the location of buried public utilities (electric, cable, natural gas and water) in your yard. It's also the law.

Wood chips

As a result of our line clearance program, wood chips may be available upon request by calling us at 800-242-9137. Learn more at www.we-energies.com/services/wood-chips.

Support a bright future with Energy for Tomorrow

Energy for Tomorrow is a renewable energy program for We Energies electric customers who want to strengthen the market for renewable electricity using resources such as wind and solar. When you enroll at the 25-, 50- or 100-percent level, we produce or purchase renewable energy to match that percentage of your electricity use. Renewable energy is charged at a higher rate than electricity generated from traditional sources, such as coal and natural gas.

Energy for Tomorrow premium per month

Based on an average home using 660 kilowatt-hours (kWh) per month. Charges are in addition to the regular electric bill.

25%	\$0.00290/kWh	\$1.91
50%	\$0.00579/kWh	\$3.82
100%	\$0.01158/kWh	\$7.64

Enroll in Energy for Tomorrow at www.we-energies.com/eft

Product Content Label¹

Green-e[®] Energy Certified New² Renewables in Energy for Tomorrow

	2024 historical		2025 prospective	
Energy for Tomorrow Green-e certified new renewables				
Solar	5%	WI	5%	WI
Wind	95%	WI	95%	WI
Total	100%		100%	

We Energies overall power mix

	2024 historical	WI, MI and Manitoba	2025 prospective	WI, MI and Manitoba
Renewables	5%	WI, MI and Manitoba	9%	WI, MI and Manitoba
Coal	29%	WI	16%	WI
Natural gas/oil	37%	WI	44%	WI
Nuclear	29%	WI	31%	WI
Total	100%		100%	

Energy for Tomorrow matches 25%, 50% or 100% of your electricity use. The table to the left provides the renewable resource mix in Energy for Tomorrow in 2024, as well as the projected resource mix in 2025.

¹ Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before Aug. 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased. Historical figures reflect the power delivered to Energy for Tomorrow customers in 2024.

² New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e[®] Energy.

For comparison, the current average mix of resources supplying the United States includes: petroleum (38%), natural gas (36%), renewable (9%), coal (9%) and nuclear (9%). This resource mix was prepared in accordance with the U.S. Energy Information Agency.

Energy for Tomorrow is Green-e certified and meets the environmental and consumer protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at green-e.org.
